• Virtual Exchange Program (VEP)

Also known as COIL, the UERJ VEP Program is a virtual collaborative learning modality that aims to offer undergraduate students a free international experience opportunity. The demand starts with the professors.

• Outreach Project Experience

Students engage in hands-on practice through community outreach and humanitarian and scientific projects, applying academic knowledge to develop collaborative solutions that strengthen the bond between the university and society. See opportunities on our website.

• Research Project Experience

Students gain hands-on practice within research laboratories, collaborating on scientific projects to develop technical expertise. See opportunities on our website.

• PhD Double degree

For more info: our website or qr code.
